Subject: RE: testing sharepoint for SI workgroup

Hi,

I have sent Sharepoint invites to the following people:

Kate
Carol
Richard
Paul
Andy
Gabi

Please let us know if you have not received the invite by the end of the day, or have problems accessing the website.

Thanks,
Rebecca

Subject: FW: testing sharepoint for SI workgroup

Hi All,

I've added you to the small workgroup to review the possible June1-3, 2014 stratospheric intrusion event. A few of us already tested sharepoint for sharing files and it seems to work, so we will send an invite to Gabi and Andy as well. Rebecca has an alternate approach for setting up a sharepoint account – see email below.

I'll put together a list of possible analysis products and set up a call after we have a complete set to discuss.

Thanks,
Gail

Hi All,

I just got done speaking to one of our IT folks, and he suggested creating the Microsoft Account outside of the Sharepoint site, meaning that you should try to create an account through the following website: <https://login.live.com/>

Once you have an account created, then log into the sharepoint site.

Also, I was able to see and download the RAQMS forecasts posted by Brad.

Thanks,
Rebecca

Rebecca,

Inspite of the technical problems I received an email that my account was created and was able to upload the RAQMS forecasts for June 02 to the shared folder.

Can you see them?

Brad
